Optimizing Spark: Additional Resources

This reference document is designed to complement and enhance the material we have covered in **Optimizing Spark**.

References:

1. This video provides practical advice for optimally utilising the parallelism that Spark provides. It also provides several optimisation strategies for increased performance.

   Optimizing Spark

2. This video aims to provide an understanding of some basic Spark concepts that will help you to optimize Spark, including partitioning and how to construct your cluster best for your workload.
